### Technical Spotlight

The KSE-100 Index saw the bulls holding onto their grip on the market as the Index gained 264 points during the previous week. Now we believe the time is ripe for a correction. The first resistance for the market is 12,624 and then 12,768; we feel that that the Index will experience some correction between these levels. We advise a cautious approach and must book profits at upper levels.

**Pivot Point:** 12,504.

**Support:** 12,396 and 12,297.

**Resistance:** 12,603 and 12,711.

**Recommendation:** We recommend investors to sell on strength and long positions should have strict stop below 12,396.
