Technical Profile

Immediate: Positive

Short-term: Neutral

Shooting Star

By way of a *shooting star*, the market arrested a four-day winning streak, indicating an end to the upward move. Immediate pressure towards 11451 would put short-term restriction in 11590-11652 for weakness towards 11326 and 11226-11125 area. Conversely, a break above 11652 could allow additional strength for 11729. Although the index has interpreted the near-term down-trend by breaking last reaction high of 11467 (30 Dec'11), we'd prefer to retain a restrictive view considering its residency below intermediate down-trend line and the 200-DMA.

PPL (172.25) Ability to overcome short-term restriction in 171.59-173.50 would open door to 181.40-186.45. Supports at 166.69 and 166.25

POL (355.28) Suspecting weakness towards 352.41 and 350.10-347.80. Immediate hurdle in 358.45-359.88.

FFC (165.95) Could weaken to 164.28 and 163.08-161.87. Restriction is placed in 167.44-168.19. Immediate supply at 166.7.

FFBL (46.51) In case of an immediate weakness towards 45.88, we'd see short-term barrier in 46.85-47.28 aiming for 45.02 and 44.33-43.63.

LUCK (81.1) Supply in 82.48-83.15 could invite pressure towards 79.64 and 78.55-77.47.
